Friday, Aug 17th and
Sat, Aug 18th

Misty Meadows Farm
Hill Road
Clinton, Maine

Open to the Public
Free Admission

9-5 each day

John Deere new models:

Deere introduces new 5103-5603 utility tractors ranging from 38 to 82 PTO hp. They are offered in 2 or 4wd and are powered by 3 or 4 cyl Deere engines. Transmissions will be partial syncro to full syncro with hydraulic power reverser.

Shipping began in mid July on these extremely competitively priced machines. We at Hammond Tractor are excited about this new line and feel they offer an incredible value for your dollar. Evidently customers agree, as the first several units to hit our lots have been sold within days of arrival. Come in and see for yourself.

Kuhn Windrow Merger:

Kuhn Farm Machinery has started shipping its new windrow merger. This is the first merger from Kuhn, adding to their full line of hay tools and tillage equipment.

Merging has become the method of choice for combining several windrows in grass harvesting. Mergers put less rocks and dirt into the windrow and leave a smooth windrow to chop.

The Kuhn unit features a 9' wide pickup head and 15' cross belt. The unit is powered by a self-controlled PTO drive hydraulic system and has a suspension system on the pickup head. Hydraulic side shift, a folding extension and an angled cross belt are also nice features on the Merge Maxx 300.

Exceptional Value

Hammond Tractor Service Department

STOP!

Before you pack your planter away in the machinery shed.

Let HTC inspect your planter now. Proper function in your planter is critical to a good stand of corn. The window we have to plant

next spring may be small, so why not let us help you try to avoid expensive inseason downtime by having a trained HTC tech inspect your planter today.

Contact Dave Pellerin in Fairfield.

Let our service department inspect your planter now, to save you valuable time later.....

Planning ahead saves you time & money

Thinking about a new piece of tillage equipment or a new John Deere planter?

The best time to order for next years use, is now through September 30th. Lock in the best financing or cash discounts with an order. Availability

could be a challenge with corn and soybean growers doing well nation wide.

A retail order for a six row planter placed July 31st, 2007 shows delivery in mid March 2008. Evidence shows that retail demand is strong nation wide.

"When it comes to the future, there are three kinds of people: those who let it happen, those who make it happen, and those who wonder what happened."

John M. Richardson, Jr.

News from the Fairfield Parts Dept.

Did you know that you have three options for ordering parts? You can stop in and visit the parts counter, order over the phone, or log on to the internet and order from JDPARTS.JOHNDEERE.COM. You have the ability online to check prices and inventory, view parts catalogs, order parts from Hammond Tractor, and learn about JD parts. This is a free service offered through John Deere, geared toward better serving our customers.

Call us or stop by today. Pictured are Steve, Howard, Mike & Brian.
